TECHNICAL SKILLS

- **Strong:** HTML5, CSS3, JavaScript (ES6+), Webflow, TypeScript, React.js, Next.js, Vite, Tailwind CSS, Flexbox & CSS Grid, Figma, Fetch API, Git & GitHub Node.js, Express.js.
- **Experienced:** PostgreSQL, SQL, Supabase, OAuth authentication basics, password hashing & authentication flows, REST APIs, CRUD operations, API testing (Postman), Vercel, CRUD operations, CI/CD fundamentals, OpenAI API, Prompt Engineering, Python.

EXPERIENCE

Frontend Developer, Champagne Dupont (Freelance)

Feb 2026 - April 2026

Link: <https://www.champagne-jean-claude-dupont.com/>

- Built a responsive frontend website with React, Next.js, and TypeScript, turning Figma designs into reusable components for a consistent UI on mobile and desktop.
- Implemented mobile first layouts with Tailwind CSS, Flexbox, and CSS Grid, making the site look and work well on all screen sizes.
- Collaborated with a UI/UX designer to turn Figma designs into pixel perfect UI, refining spacing, fonts, and layout to keep the brand consistent and deliver a polished site.
- Developed modular, reusable UI components in Next.js using component based architecture to make the code easier to maintain and update.

Software Engineer, OtterDr (Open Source)

Jan 2026 - Feb 2026

Link: <https://www.otterdr.com/>

- Developed a VS Code extension using TypeScript and the VS Code Extension API, enabling real time AI powered error analysis for developers.
- Implemented AI integration with OpenAI API to generate actionable explanations from user selected error lines, using async/await for secure and responsive API calls that reduced error resolution time.
- Built an interactive sidebar UI with Webview APIs, HTML, and CSS, utilizing properties and methods to dynamically update AI feedback, improving developer workflow and clarity..
- Used Node.js for backend logic to handle requests between the VS Code extension and the AI API, implementing asynchronous communication for real time results.
- Applied Git & GitHub workflows, including branching, pull requests, and issue tracking, to collaborate effectively in a 4-person open source team while maintaining code quality and version control.

Office Support Clerk, Haley Guiliano LLP

Oct 2023 - Jan 2025

- Managed and tracked inventory for IT equipment, office supplies, and promotional items, maintaining detailed Excel tracking sheets, monitoring stock levels, and ensuring all offices were fully stocked by coordinating and placing orders as needed.
- Built and maintained strong vendor relationships by following up on orders, troubleshooting delivery issues, and ensuring timely fulfillment, while keeping Office Manager informed of inventory updates and changes.
- Provided end to end administrative and operational support, including scheduling meetings, interviews, and catering, anticipating team needs, and maintaining strong cross functional communication to ensure smooth office operations.
- Organized company events, such as summer parties, by sending invitations, tracking RSVPs, managing headcounts, and coordinating logistics for venues and catering, ensuring seamless execution and resource planning.

Retail Merchandising and Sales Assistant, Doviana - Sustainable Fine Jewelry

Oct 2022 - Oct 2023

- Managed and tracked inventory of 70+ jewelry items in Excel and on the website, monitoring stock levels and communicating with the owner about which products were selling most and required restocking.
- Optimized in store and online product presentation, aligning displays with current fashion trends and customer preferences, which increased upsell revenue by 10% and enhanced the overall shopping experience.
- Expanded online product visibility and boosted weekly international sales from 3 to 20+ by strategically promoting the digital storefront to tourists and online customers, growing brand reach and engagement while supporting merchandising initiatives.
- Leveraged product knowledge and trend insights to recommend necklaces, bracelets and earrings, effectively increasing average transaction value and ensuring the right products reached the right customers at the right time.

EDUCATION / PROFESSIONAL DEVELOPMENT / CERTIFICATIONS

Future Code x Codesmith, **Advanced Residency for Software Engineer**

July 2025 - April 2026

[Google, Google Ads Search Certificate](#)

March 2026

[Hubspot, Digital Marketing Certificate](#)

March 2026

[Google, Data Analytics Certificate](#)

March 2024

COOP Careers, **Data Analytics Apprentice Certificate**

Aug 2023 - Dec 2023

CUNY - Hunter College, **Bachelor of Arts in Human Biology**

Aug 2018 - May 2023

PROJECTS

Bond Website App: Built a responsive React, TypeScript, Vite & Tailwind app for long-distance couples, integrating geolocation and map APIs to track distances and important dates. **Link:** <https://tinyurl.com/BondWebsiteAppSR>

INTERESTS

- **Languages:** Fluent in English & Spanish, beginner in French (working toward fluency).
- **Sports:** Completed a half marathon (Feb 2026), training for a full marathon.
- **Creative:** Knitting. **Fun:** LEGO building, Mario Bros, Animal Crossing
